

Oyster Aquaculture Positions Available!

Texas is the only coastal state in the U.S. that doesn't have a vibrant oyster aquaculture industry. This could be changing though with the proposal of new legislation. The Harte Research Institute for Gulf of Mexico Studies at Texas A&M University-Corpus Christi and Texas A&M AgriLife Research are currently engaged in a major effort to develop oyster aquaculture in Texas.

Our planned projects involve basic scientific research, applied research, and industry training to develop a skilled private-sector workforce in both hatcheries and cage grow-out at various locations along the Texas coast from Corpus Christi to Galveston.

**We are looking for
the following
qualified researchers
and staff:**

- Assistant Professors or newly-completed post-docs with a background in shellfish (genetics preferred) for academic positions
- Post-doctoral students
- Graduate students, both PhD and MS
- Director of Oyster Resource and Recovery Center
- Oyster Hatchery Managers
- Assistant Oyster Hatchery Managers
- Oyster Hatchery Technicians
- Algae Technicians
- Oyster Cage Culture Technicians
- Outreach and Training managers
- Oyster Reef Restoration Managers

These jobs are all full-time, with benefits and retirement packages
